- [www.gxs.com/Macys](http://www.gxs.com/Macys)

# Business Drivers

Business Leaders from all areas are asking for the same thing...**More Product Data!**

- **E-com**
  - **Need** product *attributes* to enhance our search engine capabilities on the Web
  - **Need** *details* on products to meet consumer demand
  - **Need** automated process to retrieve images and copy from our suppliers
    - Spending too much time chasing images and copy
    - Can't publish to the Web without it. *Affecting speed to market*
- **Supply Chain**
  - **Need** information to label package *hazardous* for shipping
  - **Need** *dimensional/weight* information to maximize carton size for shipping
- **Merchants**
  - **Need** to see *image* of item at time of order to review product
  - **Need** *attributes* for enhanced business intelligence analytics
  - **Need** Market *Images*
- **Stores**
  - **Need** *image* to help locate item for consumer
  - **Need** *image* for promotional/advertising event setup

# E-Commerce Trends

- E-Commerce sales are predicted to continue double-digit growth
- 70% of consumers research online before they shop in stores
- 36% connect to the web while in stores
- It is estimated that digital interactions influence 50 cents of every dollar spent in stores

# E-commerce Item Set-up Challenge

## Ordering a hat/PO create:

- Style Number
- 20 digit Style Description
- Color Description
- NRF Color Code
- Size Description
- NRF Size Code
- UPC Number

## Selling a hat with extended attributes:

- New Era
- Structured Fit
- Mid Crown
- Flip Bill
- 100% Polyester
- Team Designation
- Stretch Fit
- Raised Embroidery
- Diamond Era 39THIRTY Cap
- Moisture Absorbing Sweatband
- Dry clean
- Lots of images

# Current Business Process for Most Retailers

- Creating Multiple Spreadsheet Formats
- Shooting Multiple Image Formats
- Running Around the Building Gathering Data
- Email Attachments
- Snail mail
- DVD/CD
- Drop Box
- Manual FTP

***2 to 4 Additional Weeks to Start Selling on e-commerce Site***

# Manual item setup = supply chain inefficiency

# Who is asking for Extended Attributes?

- Many different retailers participate across different segments of the industry.
- Leading retailers have already sent out letters to their trading partners asking for this information.
- There are recorded webinars for reviewing retailer requirements on the OpenText/GXS landing pages.
- Common goals:
  - Understanding of required attributes and their definitions.
  - Collaboration with retail industry leaders
  - Partnership with GS1

# Extended Attributes and Images - Status

## OpenText/GXS Customer Focus for 2015

- Partner with key retailers and vendors on the GS1 Committees:
  - Phase 2 of General Merchandise and Apparel
  - Sporting Goods
  - Hardlines
- Partner with key retailers on enablement of extended attributes and images:
- OpenText/GXS Program Support includes:
  - Landing page for each retailer
  - Support for vendor enablement
  - Educational Webinars
- OpenText/GXS – Winner of the GS1 2015 Solution Provider Excellence Award

# Extended Attributes and Images - Status

## GS1 Extended Attribute Guide

The example here is taken from the GS1 Extended Attribute Guide Phase 2

➤ **Just released May 2015**

- Added additional attributes
- Added code lists

➤ Current Guideline is available on the OpenText/GXS landing page:

- [http://www.gxs.com/catalogue/extended\\_attributes](http://www.gxs.com/catalogue/extended_attributes) The example here is taken from the GS1 Extended Attribute Guide Phase 2

➤ Attributes that do not apply to a item, will not need populated:

- Example #1 = *Fur Animal Name*- if fur isn't present on item, do not populate.
- Example #2 = *Heel Height*- *doesn't apply to hats, no need to populate.*

# How Guidelines Can Benefit the Process

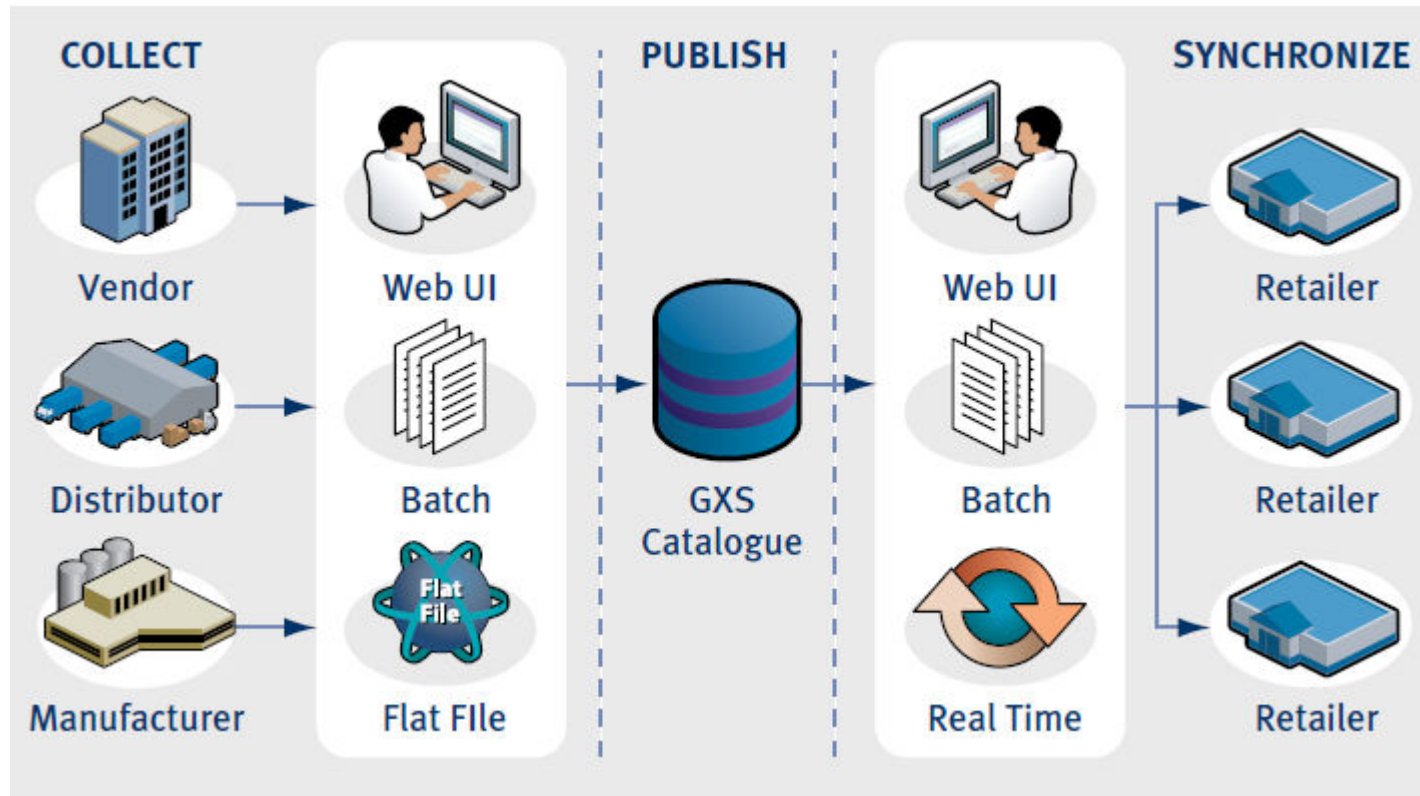

## Vendor Benefits

- Consistent Brand Representation
- Eliminate Many Existing Manual Labor Intensive Processes
- Produce One Set of Images and Attributes for All Retailers
- Reduce the Need to Provide Samples for Retailers to Handle Their Own Photography
- Allows Product Images & Attributes to be Provided Much Earlier in the Business Process Cycle (Pre-Marketing Possible)

## Retailer Benefits

- Create a Homogenous Customer Experience For Omni-Channel
- Consistent Format and Transport from Vendors
- Eliminate Many Existing Manual Labor Intensive Processes
- Less Errors in Matching Images and Attributes to Product
- Publish Product Earlier in the Process – **Speed to Market!**

# OpenText/GXS Active Catalogue

OpenText/GXS Active Catalogue enables item synchronization for all of your trading partners through a single source

# Preparing to Load Attributes and Images

- Understand the required attributes
  - Review Trading Partner and OpenText/GXS image and attribute information
- Obtain the required attributes
  - Review online resources (Trading Partner Landing Page or online OpenText/GXS Catalogue Documentation) to identify what attributes you should be providing
- Transform your data into the industry standard/Catalogue attribute format
  - Guides and Templates available at:  
[http://www.gxs.com/catalogue\\_extended\\_attributes](http://www.gxs.com/catalogue_extended_attributes)
  - Update your processes to support the required attributes (EDI maps, User Interfaces, etc.)
  - Guides and Templates available at OpenText/GXS Trading Partner Landing pages or: [http://www.gxs.com/catalogue\\_extended\\_attributes](http://www.gxs.com/catalogue_extended_attributes)

# How Vendors Use the OpenText/GXS Catalogue

- Vendors can access their catalogues in a number of ways
  - 832
  - CSV
  - Web User Interface (UI)
  - Web Services
- No method is mutually exclusive. ***Most vendors use a combination of methods to publish and update their item information.***
- If using OpenText/GXS to host images you must use
  - Web Services
  - User Interface (UI)
- EDI 832 does not support loading physical images
  - Supports the Image URL and image information

# Uploading Attributes via a CSV File

- Download the CSV template from the Trading Partner landing page
  - [www.gxs.com/macys](http://www.gxs.com/macys)
- Fill out the CSV template offline with all of the required information.
- Once complete, convert the file to a text file, and save to a location on your computer.
- **Two separate.csv templates:**
  - Attributes
  - Images

# Uploading Attributes via a CSV File

The screenshot displays the GXS Active Catalogue web application. The top navigation bar includes the GXS logo, the text "Active Catalogue", and a login status: "You are logged in as: QVEN630 for VENDOR DEMONSTRATION (124154612043)". On the left, a sidebar menu lists various sections: Catalogue, Data Management, NRF, Account, Product Documentation, and Administration. The "Text File Upload" option under Data Management is highlighted with a blue bar and an arrow pointing to it. A callout box with the text "Select 'Text File Upload' option to retrieve you file to load to the Catalogue." points to this menu item. The main content area is titled "Text File Upload" and contains fields for "Upload Type" (radio buttons for Item and Image), "Text File:" (with a "Browse..." button), and "Date Format:" (a dropdown menu set to "MM/DD/YYYY"). Overlaid on this is a Windows-style "Choose File to Upload" dialog box. The dialog shows a file explorer view of a folder named "TXT FILES TO LOAD". The file list contains one item: "DDS\_CSV\_Item\_Upload\_Template.xls". The "File name" field at the bottom of the dialog shows "DDS\_CSV\_Item\_Upload\_Template.xls" and the file type is set to "All Files (\*.\*)". "Open" and "Cancel" buttons are at the bottom right of the dialog.

# Uploading Attributes via an 832

- If you are currently updating your Catalogue with the 832, you can reference the batch guide when adding additional attributes to your map.
- This is available to download on the Catalogue website, as well as the Extended Attribute Guideline.

# Uploading Images in your Catalogue

- The Catalogue can support your physical images and/or your image information.
  - The physical image can be loaded to the Catalogue by:
    - Web Services
    - Web User Interface
  - The image URL and information can be loaded to the Catalogue by:
    - Web Services
    - Web User Interface
    - 832
    - CSV File Template

# Options for Image Uploading

## Option 1: Load Physical Image

# Uploading Images in your Catalogue

- When you choose to load or update your images or image information via the Catalogue, you should first download the following guides:
  - GS1 Image and Attribute Guide
    - [http://www.gxs.com/catalogue\\_extended\\_attributes](http://www.gxs.com/catalogue_extended_attributes)
  - GXS Brower Interface User Guide for Vendors
    - <https://catalogue.gxs.com>
  - GXS Image Actions Template for Catalogue Image Data for CSV
    - <https://catalogue.gxs.com>
  - GXS Web Service Guide
    - <https://catalogue.gxs.com>

# Uploading Images in your Catalogue

- When loading your image information via the User Interface(UI)
  - Click on the hyperlink under “IMAGE”
  - Fill in the image information
    - Image file name
    - File type (jpg)
    - Location
    - etc

The screenshot shows a web application interface for managing product media. At the top, a breadcrumb trail reads 'Selection Code List > Product List > Product Media'. Below this is a sidebar with a list of links: 'Company Name', 'Account Number', 'Selection Code', 'Description', 'Product', 'Product Description', and 'Images'. The 'Images' link is highlighted. The main content area is titled 'Image Attributes' and contains a 'Save' button in the top right corner. The form fields are organized into two sections. The first section includes: 'Color Code' (text input), 'File Name' (text input with a note 'Include the file extension: sample.jpg'), 'File Type' (dropdown menu showing 'JPG-JPEG'), 'Image Type' (dropdown menu showing 'SI-Still Shot'), 'Purpose' (dropdown menu showing 'INT-Internet'), 'Orientation' (dropdown menu), and 'Location Type' (dropdown menu). The second section includes: 'External Location' (text input), 'File Size' (text input), 'Pixel Density (DPI)' (text input), 'Height' (text input), 'Width' (text input), 'Image Style' (dropdown menu), 'Facing (GDSN)' (dropdown menu), 'Angle' (dropdown menu), 'Clipping Path' (text input), and 'Image Description' (text area with a vertical scrollbar). The 'Image Description' field is currently empty.

# Uploading Images in your Catalogue

- Once your image information is loaded, you can then load your physical image if you have not loaded to an external FTP or URL location.

The screenshot shows a software interface with a background window and a foreground 'Upload Image' dialog box.

**Background Window:**

- Company Name: VENDOR DEMONSTRATION
- Account Number: 124154612043
- Selection Code: 980
- Description: TEST ITEMS
- Product: 05-159-321
- Product Description: UA WATCH CAP
- Images: 1

**Image Details List:**

Color Code:	001
File Name:	KNIT_CAP.JPG
File Type:	JPG-JPEG
Image Type:	SI-Still Shot
Purpose:	INT-Internet
Orientation:	PRI-Primary
Location Type:	LMI
External Location:	
File Size:	32
Pixel Density (DPI):	1020
Height:	350
Width:	350
Image Style:	PRO-Product
Facing (GDSN):	1-Front
Angle:	1-Center, No plunge angle
Clipping Path:	
Image Description:	

**Upload Image Dialog Box:**

- Color Code: 001
- File Name: KNIT\_CAP.JPG
- File Type: JPG-JPEG
- Buttons: Upload Image, Browse..., Save

# Uploading Images in your Catalogue

- You can load Style or Style/Color images at the Product Level, as well as multiple images facings at both levels
- GTIN level supports the ability to load multiple facings
- Images and Image Information are immediately available for your trading partner once you see that it has been saved successfully.

<a href="#">Product</a>	△	Description	Create Date	Last Update Date	GTINs	GTIN Filter	Images
<a href="#">123-456</a>		OPEN TOE SHOE	07/13/2014	10/20/2014	<a href="#">2</a>	<a href="#">2</a>	<a href="#">1</a>

APPAREL AND GENERAL  
MERCHANDISE

### Checklists to Help Retail Trading Partners Implement Extended Attributes & Images

The Extended Attributes Checklist	
	<ol style="list-style-type: none"> <li>1. Obtain GS1 US Extended Attributes Guideline (<a href="http://goo.gl/ZoLRYz">http://goo.gl/ZoLRYz</a>)</li> <li>2. Refer to section 1.6 (Product Attribute Matrix by Product Category) of the guide to get an overview of your product category and which attributes apply to your company                             <ol style="list-style-type: none"> <li>a. Refer to section 2 to review definitions of each applicable attribute</li> <li>b. Determine what attributes you are currently providing</li> <li>c. For remaining attributes determine current availability within organization</li> <li>d. Develop plan for capturing new attributes</li> </ol> </li> </ol> <p><i>Note: There may be retailer specific attributes that are not defined in the guideline. These attributes should be considered when developing your solution.</i></p>
	<ol style="list-style-type: none"> <li>3. Determine what teams need to be involved to implement the project                             <ol style="list-style-type: none"> <li>a. Sales representatives</li> <li>b. IT team</li> <li>c. EDI/U.P.C. team</li> <li>d. Item Master team</li> <li>e. Product Development team</li> <li>f. E-Commerce/Drop Ship team</li> </ol> </li> </ol>
	<ol style="list-style-type: none"> <li>4. Determine what method(s) will be used to provide the attributes to your trading partners.                             <ol style="list-style-type: none"> <li>a. Third Party Catalog Service</li> <li>b. GS1 US Standard Spreadsheet</li> <li>c. Retailer's Web Portal</li> <li>d. Retailer's Proprietary Spreadsheet</li> <li>e. Other</li> </ol> </li> </ol>
	<ol style="list-style-type: none"> <li>5. If using Third Party Catalogs, decide the method of transport(s)                             <ol style="list-style-type: none"> <li>a. EDI via 832</li> <li>b. Web Services (XML)</li> <li>c. Spreadsheet upload</li> <li>d. Manual entry via web portal</li> </ol> </li> </ol>
	<ol style="list-style-type: none"> <li>6. Consider the timing of attribute availability                             <ol style="list-style-type: none"> <li>a. All attributes may not be available at the time U.P.C.s are assigned and published                                     <ol style="list-style-type: none"> <li>i. The purchase order process may not require all the extended attributes</li> <li>ii. Web attributes and publishing may come later in the process</li> </ol> </li> <li>b. Develop a process which allows for attribute updates after the initial product setup</li> </ol> </li> </ol>
	<ol style="list-style-type: none"> <li>7. Develop a pilot/testing strategy</li> <li>8. Once pilot is successful, move to production</li> </ol>

# Readings

- To see how another company has implemented the use of images, J.Renee and GS1 authored a white paper that is very informative.
- [http://www.gs1us.org/DesktopModules/Bring2mind/DMX/Download.aspx?Command=Core\\_Download&EntryId=1274&PortalId=0&TabId=785](http://www.gs1us.org/DesktopModules/Bring2mind/DMX/Download.aspx?Command=Core_Download&EntryId=1274&PortalId=0&TabId=785)

### CASE STUDY

## J.Renee

### J.Renee Leads the Effort to Apply GS1 Standards to Product Imagery

#### CHALLENGE

Visual representation of products is essential to sales. However, the complexities of image sharing among retail trading partners had reached dramatic proportions, without a common set of guidelines to govern technical requirements, delivery methods or, indeed, any universal standards on what, how or when, visual imagery should be exchanged between partners.

The explosion of eCommerce, in addition to brick-and-mortar stores, further complicated image delivery management to nearly uncontrollable levels. Consider that until the wide adoption of standards, a manufacturer supplying a dozen retailers could be asked to supply product images in a dozen different ways.

#### SOLUTION

By adopting GS1 Standards and guidelines that govern visual imagery in conjunction with those standards already in use by industry trading partners, the labor-intensive process of getting images to retailers who need them to sell products has been streamlined—and greatly enhanced.

#### BENEFITS

Suppliers now have a single set of guidelines to follow for sharing product images, and affording latitude in making the parameters work with internal systems. Both suppliers and retailers realize productivity gains, cost savings, enhanced speed-to-market capabilities, and marketing alignment that can maximize profitability.
